DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 9 is rejected under 35 U.S.C. 102(b) as being anticipated by Miura et al (US 5274717).

With respect to claim 9, Miura discloses a parallel processing that includes a data formatter for receiving a data stream and constructing therefrom a plurality of data lines, said data formatter comprising n output lines, each outputting respective l/n of each of the data lines; and n processing groups, each comprising m processing nodes commonly connected to one of the n lines, wherein each of the m processing nodes is for processing approximately l/m of the data flowing in one of the n lines substantially simultaneously and independently of the other processing nodes, (see figures 31, 3 and 17, and col. 5 lines 50 to col. 6 line 5) as claimed.

Allowable Subject Matter

3. Claims 10 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
